

Daylight Savings Patch Instructions (USA / Canada)

	Schlage / Geoffrey 5.1.4.x and earlier	Schlage / Geoffrey 5.1.5.x or 5.1.6	Schlage 5.2.0	Locklink Express & 7 / Schlage Express (any version)	SEVMS (or GVSD) - Schlage Enterprise Video Management System (Windows OS)	SVSU - Schlage Video Storage Unit (Embedded OS)
System has offline locks (with or without online locks)	<ol style="list-style-type: none"> 1. Upgrade to 5.2.0 2. Run TZInstall program once to patch database 3. Run TZInstall program on any workstations that require it* 4. Tour and reprogram all locks 5. Restart any CIMs that are running 	<ol style="list-style-type: none"> 1. Run DST_OLI_Patch installation at least once to patch the database. This installation file includes an updated version of the OLI and the TZInstall program 2. Run DST_OLI_Patch Install program on any workstations that run the OLI program or require the TZInstall program* 3. Tour and reprogram all locks 4. Restart any CIMs that are running 	<ol style="list-style-type: none"> 1. Run TZInstall program once to patch database 2. Run TZInstall program on any workstations that require it* 3. Tour and reprogram all locks 4. Restart any CIMs that are running 	<ol style="list-style-type: none"> 1. Run TZInstall program on any workstations that require it*. Database patching is not necessary 		
System has online locks only	<ol style="list-style-type: none"> 1. Run TZInstall program once to patch database 2. Run TZInstall program on any workstations that require it* 3. Restart any CIMs that are running 					
Video Servers and Video Client Workstations					<ol style="list-style-type: none"> 1. Run TZInstall program once on the DVR (Video Server) to update the Windows Registry 2. Run TZInstall program on any video client workstations that require it* 	<ol style="list-style-type: none"> 1. Embedded systems require manual intervention. May also require an upgrade prior to DST modification. Please refer to the 'SVSU Daylight Savings Technical Bulletin' for detailed instructions.

* This includes all computers running Win95, Win98, WinNT and Win2k. It also includes all workstations running WinXP or Win2003 that do not have the latest Windows Update. It is important to note that the DST issue is a Windows registry issue and will affect most software running on such workstations, not just Schlage software.
